IDM administrator/development

Het CAK

Administer and develop/enhance existing drivers

At Het CAK the existing NetIQ IDM 4.02 / 4.5.3 (Post upgrade) landscape was managed, and at request drivers were changed and/or enhanced according to the needs of the customer.

The managed/customised drivers were of type eDir-eDir, AD-, Loopback, text import and SOAP drivers developed via Custom Designer-Packages.

Next to managing/admistering the IDM environment the NetIQ AccessManager 4.x setup was also managed and various configuration changes were performed.

nov 2015 – present	IDM Consultant Build/development of functional drivers	Lentis
	At Lentis for a new project-phase a new IDM 4.5.x environment was installed/deployed after which a variety of drivers, like lifecycle, JDBC, eDir-eDir, etc. were developed and deployed.	
feb 2015 – present	IDM Consultant Build/development of functional drivers	Carmel College
	At the Carmel college installed and set up the different environments with NetIQ IDM products. After setup eDir-eDir and multiple AD- drivers were developed and implemented.	
okt 2014 – present	IDM Consultant Build/development of functional drivers	Unisys PSS
	At Unisys Payment Services & Solutions heavily participated in creating the functional and technical design, after which a new NetIQ IDM 4.02 environment was installed and configured with multiple AD-, housekeeping and JDBC-drivers were implemented.	
nov 2014 – mar 2017	IDM Consultant Build/development of functional drivers	Innovam
	At Innovam the existing NetIQ IDM solution was migrated to a newly created /set up environment. The implemented drivers were adapted/rewritten for this new NetIQ IDM 4.5 solution and incorporated AD/Exchange- loopback/Housekeeping and JDBC drivers (MSSQL) rewritten or adapted according to the specification of the new functional design.	
may 2014 – okt 2014	Technical Administrator Management of servers and endpoints / IDM4 development	Provincie Utrecht
	At Provincie Utrecht performed the management of the largely virtualised with VMWare SUSE-Linux / Microsoft Windows 2008 / Exchange 2010 environment. Workstations with Window 7 were managed with ZCM 11 as tool. With ZCM 11 application-packaging was performed to update existing or implement new applications. An existing NetIQ IDM4 environment was managed and enhanced to reflect the requirements and needs of the business.	
jan 2014 – mar 2014	IDM Consultant Migrationactivities	Lentis
	Within the project InfraLink Lentis was building an up-to-date infrastructure, with the latest available versions of Novell software(OES / GroupWise / Zenworks) and Microsoft (Windows 2008, Active Directory, Windows 7 and Office 2010) implemented. Part of the migration was moving 5.000 users worth of mail, files and all accompanied rights to the new infrastructure.	

Parallel to this migration adaptations were performed on the Identity & Access management environment. Changes were mostly made autonomous, but under the supervision of a Senior IDM colleague.

jan 2014 – present

IDM Consultant

Avans Hogeschool

Migration and build

Avans Hogeschool has undergone a big change in their backoffice IT, in which mail was migrated from GroupWise to Google mail (students) and Microsoft Exchange (employees). For a smooth running operation the complete Identity & Access management environment was upgraded and needed drivers were build, adapted or enhanced. Under the responsibility of two senior colleague's participated in the installation and migration of the Identity management environment together with adaptating and enhancing the drivers.

okt 2012 – dec 2013

ICT Administrator backoffice

municipality Tiel

Infrastructural administration as member of the IT-Department

In this timeframe administration was performed on a clustered Novell and Groupwise environment. The municipality Tiel was at the dawn of a cooperation with neighbouring municipalities- project. The focus of the internal organisation was on this project. To deliver continuity on the existing infrastructure and services management was performed on storage, virtualisation, mail etc.

mrt 2012 – okt 2012

IDM Consultant

ING / Everett

Multiple projects

As a team member contributed to development, testing and deployment of changes in an Identity management environment. In some cases acted as the eDirectory-troubleshooter in the team.

feb 2009 – dec 2011

ICT beheerder Backoffice

municipality Dordrecht

Infrastructural administration as member of the IT-Department

In a heterogenic environment with a Novell Netware cluster, eDirectory, WSUS, VMWare clusters, Citrix, HP SIM, Nagios, ZENworks and GroupWise as member of a self-regulating IT-administration team performing next to day-to-day management preparing the environment for an upcoming migration in the form of upgrades or replacing (and installing) systems.

2006 – heden

Multiple roless

Multiple customers

Through the years contributed to a stable IT environment at different customers, for example Biomet, Bank Insinger de Beaufort/Ordina, Comsolve/irc-World, VNC / De Unie, municipality Weert, Syncera, municipality Midden-Drenthe, Ploum Lodder Princen and many more. The responcibillities ranged from administration, migrations, upgrades, packaging , imaging and Identity- and access management up to disaster recoveries.
